connections

⚠ Caution

- When connecting an external device, match the colour of the connection terminal to the cable. Each Cable Box/Satellite receiver (Set-Top Box) has a different back panel configuration.

CONNECTING A CABLE BOX/SATELLITE RECEIVER (SET-TOP BOX) VIA HDMI

1. Connect an HDMI Cable(Not supplied) between the HDMI IN (1, 2 or 3) jack on the TV and the HDMI jack on the Cable Box/Satellite receiver (Set-Top Box).

➤ No additional Audio connection is needed for an HDMI to HDMI connection.

CONNECTING A CABLE BOX/SATELLITE RECEIVER (SET-TOP BOX) VIA DVI

1. Connect an HDMI Cable(Not supplied) between the HDMI IN 2 jack on the TV and the HDMI jack on the Cable Box/Satellite receiver (Set-Top Box).
 2. Connect Audio Cables(Not supplied) between the DVI IN (HDMI 2) [R-AUDIO-L] jack on the TV and the Cable Box/Satellite receiver (Set-Top Box).
- When using an HDMI/DVI cable(Not supplied) connection, you must use the HDMI IN2 jack.

CONNECTING A CABLE BOX/SATELLITE RECEIVER (SET-TOP BOX) VIA COMPONENT CABLES

1. Connect a Component Cable(Not supplied) between the COMPONENT IN (1 or 2) [Y, P_B, P_R] jacks on the TV and the COMPONENT jacks on the Cable Box/Satellite receiver (Set-Top Box).
2. Connect Audio Cables(Not supplied) between the COMPONENT IN (1 or 2) [R-AUDIO-L] jacks on the TV and the AUDIO OUT jacks on the Cable Box/Satellite receiver (Set-Top Box).

Storing Channels Automatically

1. Press the **MENU** button to display the menu.
Press the **▲** or **▼** button to select **Channel**, then press the **ENTER** button.
2. Press the **▲** or **▼** button to select **Auto Program**, then press the **ENTER** button.
3. Press the **ENTER** button.
The TV will begin memorizing all of the available channels.
After all the available channels are stored, the Auto program menu reappears.
Press the **EXIT** button to exit.
 - • All available analog channels are automatically stored in memory.
 - It takes approximately 3 to 10 minutes to memorize channels.

Troubleshooting

Before contacting the Samsung after-sales service, perform the following simple checks.

If you cannot solve the problem using the instructions below, note the model and serial number of the television and contact your local dealer.

Poor picture quality.	• Try another channel. • Adjust the antenna. • Check all wire connections.
Poor sound quality.	• Try another channel. • Adjust the antenna.
No picture or sound.	• Try another channel. Press the SOURCE button. Make sure the TV is plugged in. • Check the antenna connections. Make sure the MUTE button is off.
No sound or sound is too low at maximum volume.	• First, check the volume of units connected to your TV (digital broadcasting receiver, DVD, cable broadcasting receiver, VCR, etc.). Then, adjust the TV volume accordingly.
Picture rolls vertically.	• Check all connections.
The TV operates erratically.	• Unplug the TV for 30 seconds, then try operating it again.
The TV won't turn on.	• Make sure the wall outlet is working.
Remote control malfunctions	• Replace the remote control batteries. • Clean the upper edge of the remote control (transmission window). • Check the battery terminals. • Make sure the remote has batteries. • Check that the "+" and "-" ends of the batteries are inserted correctly.
Digital broadcasting screen problem.	• Please check the digital signal strength and input antenna.
The image is too light or too dark.	• Adjust the Brightness and Contrast. • Adjust the Fine tuning.
The image is too large or too small.	• Adjust the Size settings.
The visual qualities of digital channels vary.	• The visual qualities of digital channels may vary depending on the original production method (analog or digital). - If the original production method is digital: High visual quality. - If the original production method is analog: The digital program displayed on the screen is originally an analog program which has been converted to digital. • The visual quality is of an SD(Standard Definition) grade.
Screen is black and power indicator light blinks steadily.	• On your computer; check the Power and Signal Cable. • The TV is using its power management system . • Move the computer's mouse or press any key on the keyboard. • On your equipment check (STB, DVD, etc) ; Power and Signal Cable. • The TV is using its power management system. • Press the Source button on the panel or remote control. • Turn the TV off and on.
Although the TV caption shows HD, the visual quality is not satisfactory.	• The HD(High Definition) caption that appears when switching channels or when pressing the Information button on the remote control means the selected channel is a digital channel. If the broadcasting station converts an analog signal into digital and transmits the signal, the visual quality may not be perfect.
A distorted picture appears in the corner of the screen.	• If Just Scan is selected in some external devices, a distorted picture may appear in the corner of the screen. This symptom is caused by external devices, not the TV.
A Strange sound is heard.	• This is caused by minor systems operation and is not a defect.
The "Resets all settings to the default values" message appears.	• This appears when you press and hold the EXIT button for a while. The product settings are reset to the factory defaults.
